Monday September 28, 2009 The street obviously liked the news today *"Canaco Announces Preliminary Results From Magambazi Drilling 53 Metres at 4.32 Grams Gold Per Tonne"* You could have spotted that news release easily on the [Stock Research Portal](#) site first thing this morning.

Friday last, CAN closed at .16 and opened today at .29 then spiked to as high as .39 before pulling back. I mentioned it on the **Canadian Stock Alerts** blog at 10:56am this morning when it pulled back to .34 It did retest .39 and went on to a new 52 week high of .49 before closing at .41 on almost 9 million shares traded.
